RESET TWO-FACTOR AUTHENTICATION

Success!

The two-factor authentication token has been reset for user: kwame.

At next login they will be prompted to re-authorize their device. An email has also been sent to kwame@acme.com informing them of this change.

Grant Access to Applications and Assign Permissions

Choose which applications a user can access, and provide additional permissions for users that require them.

Application	Description	Additional Permissions
<input checked="" type="checkbox"/> Gatekeeper	Manage your own credentials and add additional users to securely login to the NCC Group Domain Services suite of applications. Required for all users.	<input checked="" type="checkbox"/> Account Manager
<input type="checkbox"/> Secure Registrar	Request and manage .trust domains, identity and intellectual property verification (upload TMCH file).	No additional options for permissions
<input type="checkbox"/> Continual Trust Monitoring Service (CTMS)	Securely view scan results and findings, review the .trust policies, and interface with our security operations for any questions or remediation needs.	<input checked="" type="checkbox"/> View Findings <input type="checkbox"/> Access Tech Support <input checked="" type="checkbox"/> Generate Reports

Create and view Executive and Technical Reports (PDF) -- a permission that Security Engineers, Managers or CISO's may require.

CHANGES

Table and checkbox devnotes

Choose which applications a user can access, and provide additional permissions for users that require them.

padding (pink) = 30px

☐ disabled: #CCCCCC

Label plus checkbox is the target for all checkboxes.

on hover cursor = hand

☒ selected: border = #000000

☐ unselected: border = #CCCCCC

Application	Description	Additional Permissions
<input checked="" type="checkbox"/> Gatekeeper	Manage your own credentials and add additional users to securely login to the NCC Group Domain Services suite of applications. Required for all users.	<input checked="" type="checkbox"/> Account Manager
<input type="checkbox"/> Secure Registrar	Request and manage .trust domains, identity and intellectual property verification (upload TMCH file).	No additional options for permissions
<input type="checkbox"/> Continual Trust Monitoring Service (CTMS)	Securely view scan results and findings, review the .trust policies, and interface with our security operations for any questions or remediation needs.	<input checked="" type="checkbox"/> View Findings <input type="checkbox"/> Access Tech Support <input checked="" type="checkbox"/> Generate Reports

Once selected, a row turns blue to indicate it's active. Otherwise alternate row styling applies: #FFFFFF and #E5E4E5
Gatekeeper is an exception: it cannot be de-selected from the Application column.

SAVE CHANGES

Tooltip devnotes

Choose which applications a user can access, and provide additional permissions for users that require them.

Application	Description	Additional Permissions
<input checked="" type="checkbox"/> Gatekeeper	Manage your own credentials and add additional users to securely login to the NCC Group Domain Services suite of applications. Required for all users.	<input checked="" type="checkbox"/> Account Manager
<input type="checkbox"/> Secure Registrar	Request and manage .trust domains, identity and intellectual property verification (upload TMCH file).	No additional permissions (login only)
<input type="checkbox"/> Continual Trust Monitoring Service (CTMS)	Securely view scan results and findings, review the .trust policies, and interface with our security operations for any questions or remediation needs.	<input checked="" type="checkbox"/> View Findings <input type="checkbox"/> Access Tech Support <input checked="" type="checkbox"/> Generate Reports

Creating and viewing reports is a permission that Security Engineers, Managers or CISO's may require.

SAVE CHANGES

Tooltip appears on selection. One tooltip is active at a time. The tooltip should fade out after 5 seconds (?) and disappear when de-selected. And re-appear on re-selection. And be dismissed by a click anywhere outside the tooltip.

Grid devnotes

Tables are used for the most prominent of the new features: Users Page (index) and Capabilities selection -- these don't depend on the grid.

The "View User" page was designed with the Foundation grid in mind -- the page should use full width (12 col) and 2X (6 col)
